Personal Attention

Connecticut Brace and Limb is unlike any prosthetic and orthotic provider that you have used in the past.

Unlike large companies that see dozens of clients each week, CTBL takes the time to get to know their clients and learn about their capabilities, their goals, and their expectations. Our attention to detail facilitates superior outcomes for every client. If you want to achieve the highest level of function, you owe it to yourself to work with a dedicated clinician who knows you and is available for you. Take the first step today by contacting CTBL and setting up an appointment for a free evaluation.

Excellent Care

At your appointment, a highly skilled and experienced clinician will perform a comprehensive evaluation and consult with your entire care team to make the best recommendations. When appropriate, the clinician will take all the necessary measurements and molds that are needed to fabricate your unique device. Your device,

and all the education and training needed to ensure its successful use, will be provided in a timely and professional manner.

What sets CTBL apart?

CTBL, we embrace the future while respecting for the past. We believe that technology is only beneficial when it helps to provide a higher level of service for our clients. We use 3D laser scanners to capture anatomic shapes, 3D printing for quick and accurate fittings, automated computer systems for administrative efficiency, and use the best materials and componentry whenever appropriate. At the same

time, we handcraft each device in-house with time-honored techniques and ensure that only the highest caliber materials and processes are used. This results in a superior product, that fits better, feels better, and performs better than those provided by our competitors.

Patient-First Team Approach

We coordinate care with the region's best physicians, physical therapists, and allied health professionals. Treating you as a unique individual and ensuring that you receive all of the best services and treatments that are available.

Fast Response

CTBL is a small company in central Connecticut. We monitor our phone line 24 hours/day, 7 days/week and we are available through email as well. An experienced clinician or well trained staff member will return your call or email within 24 hours, even on the weekends. We are committed to providing the very best orthotic and prosthetic services to the citizens of Connecticut. Call today and begin the journey of unlocking your highest potential! 860-740-2154
